OUR EXPERIENCE**

Applications and Process Development

We have machines available for your testing needs!

- New Bekum shuttle machines allow development using the latest technology
- Bekum has a variety of feedscrew and head designs to process most materials and container sizes
- Stock bottle molds are available for use
- In-house performance testing including container measurement, multi-layer analysis, top load, and drop impact testing

In-House and On-Site Customer Processing Support!

- In-house head tooling design and manufacture
- Assistance for new products on existing machines including machine modification, mold/tooling manufacture, and qualification
- Engineering and production support at your facility allows timely machine and/or sequence upgrades for application requirements
- Complete factory machine qualification under production conditions to ensure performance and specification compliance prior to shipment
- On-site training and/or processing assistance is available
